# ORGES MIHAJ

**GitHub**:   github.com/OrgesMihaj                                    **orges.mihaj@hotmail.com**

**LinkedIn**: linkedin.com/in/orgesmihaj                                              +355 696600199

**Portfolio**: orgesmihaj.com                                                            Tirana, Albania

## EDUCATION

2013 – present          **Harry T. Fultz Institute, Tirana, Albania**
- General professional training in electronics field which consists of maintaining, repairing, and programming of electronic devices. Projects included electronic schema analysis, programming microcontroller like Arduino, and problem-solving algorithms.
- Website: www.harryfultz.edu.al

2014 – present          **Washington Education in Albania/Kosovo**
- Online-based school committed to train Albanian students in software engineering. Recipient of scholarship provided by Real Visualz LLC Bellevue WA, USA. Coursework included entrepreneurship, developing ideas and design concepts, object-oriented languages ideas and concepts, building dynamic webpages, and project management.
- Websites: www.wekonline.com,  www.wea.com

## WORK EXPERIENCE

9/2016 – 11/2016        **Almooc.com**: *Instructor*
- Conducted in-depth tutorials on validating and processing forms with JavaScript and PHP for the largest MOOC in Albania. (*Source: goo.gl/xuL2v2*)

12/2015 – 3/2016        **Real Visualz**: *Intern, Web Developer*
- Built a cross-word type web game with 2 difficulty levels where points were awarded in a time-constraint environment. Technologies used: JavaScript, JSON, JQuery, and Bootstrap.
- Website: http://m.iwin.com/game/play/rootonyms

2015 – 2016             **Freelancer**: *Web Developer*
- Developed various web application for different clients. Used Laravel, PHP framework, to create back-end of applications and HTML5, CSS3, JavaScript, JQuery, AngularJS, VueJS, Bootstrap for front-end. Worked in Agile development environment. Optimized web images by using Photoshop CC. *(Projects available on my website)*

## ADDITIONAL INFORMATION

**Achievements**:

- **"The best of the ALMOOC" competition**: Winner of the first place by creating a windows phone application using windows app studio. *(Video: youtu.be/d-h8vSjBYTM)*

- **"ICT Awards" competition**: Together with my team, we created an CNC Machine using three old optical drivers, one Arduino, three stepper motor drivers, and one power supply. With this project, we archived the final of ICT Awards competition, the biggest competition in Albania, in the rising star category.

**Volunteer experience:**

- **Instructor on the Hour of Code event.** Teaching students around Albania on what programming is and encourage them to learn it.

**Certifications**:

- Advanced Robotics Club
- Photoshop, Illustrator, InDesign

**Hobbies:**

- Programming
- Design
- Football

**Other Activities:**

- Participant in **NASA Space App Challenge** where I developed a web tool to illustrate the impact of climate change on Earth by using graphics. These graphs represent the difficult changes that our earth is facing, such as global warming. By doing this everyone can be convinced that global warming is a real threat.
